Clinical and Translational Research Preparatory 
Public Health 194 A, B, C

Are you interested in attending graduate school and pursing a career in healthcare? Do you want to gain clinical research experience and collaborate with renowned UC Irvine faculty members from the School of Medicine, Institute for Clinical and Translational Science and Program in Public Health?

Clinical and Translational Research Preparatory-A, B C is a three course series in which students will have the unique opportunity to participate in clinical research on multiple studies. Students will be exposed to the philosophies of the National Institutes of Health and have the opportunity to learn how the rapidly evolving field of clinical and translational science is changing the future of healthcare in the United States.

Through lectures, interactive, discussions and hands on clinical research experience, this innovative undergraduate course will provide students with the knowledge and training to succeed in graduate school and in healthcare and research careers. Students will learn about ongoing research at UC Irvine through guest lectures by principle investigators and clinical research coordinators from laboratories on campus. In PH 194 B & C, students will be paired with faculty mentors and become active members of research teams at the UC Irvine main campus or at the UC Irvine Douglas Hospital in Orange. Upon completion of the course series students will have finished the necessary regulatory requirements to participate in research at UC Irvine.

For more information about this course, contact Liza Krassner, Program in Public Health at lbkrassn@uci.edu (949) 824-2358; or Jessica Vaughan, Institute for Clinical and Translational Science at jlvauha@uci.edu (714) 456-6589.
